[Client communication](#)

[Multitasking](#)

—PROFESSIONAL PROFILE

Recent graduate with a dual foundation in systems administration (ASIR) and a Master's in Cybersecurity. Hands-on lab experience deploying and hardening Linux/Windows infrastructure, alongside formal training in offensive and defensive security techniques. Looking to start my career in a security-focused role where I can build on my technical foundation and keep growing.

—PROFESSIONAL EXPERIENCE

Systems Administrator (Internship)

Mar 2025 - Jun 2025

[Nubemedia](#)

- Deployed and maintained Apache/Nginx web servers on Linux, improving average response times by 20%.
- Managed WordPress environments: updates, plugin audits, security hardening and automated backups.
- Implemented technical SEO improvements (meta tags, sitemaps, page-speed) across client sites.
- Documented system administration procedures, contributing to the internal knowledge base.

Security Assistant

Oct 2023 - Mar 2024

[Arsel Business S.L.](#)

- Operated access control and physical security protocols in high-end retail environments with zero incidents.
- Coordinated incident response and ensured compliance with security procedures in controlled settings.
- Developed strong situational awareness and rapid decision-making — skills transferable to SOC operations.

Hospitality Staff

2017 - Present

[Various Establishments](#)

- Delivered customer service in high-demand, fast-paced environments managing multiple concurrent tasks.
- Built resilience, interpersonal communication and stress-management skills transferable to any team.

—PERSONAL PROJECTS & LABS

Linux Hardening Lab

[/linux-hardening-lab](#)

Full hardening of an AlmaLinux server audited from Kali: secure OpenSSH, SFTP chroot, ACL permissions, iptables firewall and ICMP mitigation. Verified with Nmap, tcpdump and Wireshark.

Web Security Audit Lab (DVWA)

[/web-security-audit-lab](#)

Offensive web audit identifying and exploiting 6 vulnerabilities (Brute Force, Command/SQL Injection, File Inclusion/Upload, weak crypto), mapped with OWASP Top 10 and CVSS.

BadUSB Endpoint Analysis (MSc Thesis)

[/badusb-endpoint-analysis](#)

Analysis of physical BadUSB attacks with a Flipper Zero (HID injection) on Windows 11, evaluating Microsoft Defender's response and proposing technical and organizational mitigations.

SYN Flood (DDoS) Lab

[/syn-flood-lab](#)

Simulated a SYN Flood DoS attack with hping3 against AlmaLinux, analysed traffic in Wireshark and applied mitigations: SYN cookies, reverse path filtering and iptables connection limiting.
